I can not believe the N.A.B. is trying to "NAB" my local traffic and weather channels on XM! Please stifle these whining fools and tell them to quit wasting your valuable time. I choose to listen to XM because of the quality programming and excellent signal strength regardless of location. I pay for this service and the NAB should have no say whatsoever in what I can receive on my unit. I can not believe they (NAB) are trying to quash another improvement to the communications industry. Please do not let NAB mess with my freedom of choice! I know the FCC is a good and righteous government institution. Please tell NAB to quit wasting your time and to quit messing with peoples freedoms.
Thank you,

N. Mosher
